Bathrooms
to inspire

Exclusively
designed for
everyone

FIND YOUR OWN IDEA OF PERFECTION

*Whoever you are, wherever you live,
you deserve a beautiful bathroom.*

nuiebathrooms.com

We do bathrooms differently

Whoever you are, wherever you live, you deserve a beautiful bathroom. After all, it's the first place you visit in the morning and the last place you see before bed. It's where you relax and unwind, and it's often the only time you have for yourself.

That's why it's important to get things right – the right curves, the right shapes, the right taps – without needing to wait another year. We think deep baths matter more than deep pockets and that's why our bathrooms are exclusively designed for everyone.

*Now all you need to worry about is what
to sing in the shower.*

72 —
Small is Beautiful
Short on space? We have stylish products to suite all bathroom sizes, no matter how compact or snug they may be.

New from nuie... updated designs and trend setting ideas, creating even more choice when designing your dream bathroom.

What's Trending /

120 & 124 —
Get an Edge
A work of art needs a frame, so why not surround your beautiful shower with either a brushed brass or matt black framed wetroom screen.

147 & 156 —
Sustainable Solutions
Go Eco with our new water and energy saving basin taps. Look out for the EcoWare logo throughout our brochure.

Vogue Vessels
Go all the way with the monochrome trend and incorporate our beautiful matt finish vessels. Choose from a bold black, cool grey or crisp white finish.

**Make the
queue worth it**

*Family bathrooms should
be as lovely as they are
practical, so you won't
mind waiting your turn.*

The latest designs

A sleek surface, an angle, an edge – all our modern interiors are on-trend.

Go en-suite

*An en-suite bathroom
makes any bedroom
feel grander, and
it's no less than
you deserve.*

Timeless design

*Beauty is in the details,
and that's why some
styles never go out
of fashion.*

Ceramics. Curves and angles – this is where you’ll find just the right basin or pedestal, for you.

Our ceramics are expertly made and exclusively designed for everyone.

The Spa Shower Collection / NEW

Discover more spa collections online at nuiebathrooms.com

Flexible and Individual

Our luxury shower collections are designed to give you flexibility, so you can utilise each individual product and fit them to suit your own personal use and bathroom design. The shower controls in each collection can also be fitted horizontally, vertically or even outside of the showering area.

How to Choose Your Collection

- 1. Pick Your Style**
Choose from round or square designs.
- 2. Choose Your Number of Outlets**
Choose from two or three shower outlet collections – this can be a mix of shower heads, slide rail kits and/or body jets.
- 3. Choose Your Function**
 - Run all your shower outlets simultaneously or individually as you choose, by using multiple stop tap controls.
 - Operate each outlet one at a time by opting for a diverter control, to switch between each outlet.
 - A separate thermostatic control adjusts water temperature.
- 4. Single or Double Spa Collections**
Double up on your choice of collection, for a two person shower.

CE Approval /

All our radiators have been designed to provide a comfortable level of warmth needed for everyday indoor use, as well as being manufactured to conform to BS EN 442-1:2014, and all current European standards.

Our heating products have all been independently tested and we are delighted to present our collection of fully certified CE products that conform to all applicable standardized regulations.

Heating FAQs /

How much heat will I need?
All rooms are individual and therefore the heat output required from your selected radiator will vary. It is important that you choose the correct radiator to ensure that enough heat is generated to keep you comfortable. A sensible tip is to always choose a model with a higher heat output than you require, as this can always be controlled by turning them down.

What is the measurement for heat output?
All our radiators carry the heat output measured in either:
· BTUs (British Thermal Unit) or
· Watts
BTUs are shown with water temperature of 80°C at radiator inlet.

What heat output will I need for my room?
It is highly recommended that your installer calculates the BTU requirement for each applicable room, so you can get the maximum heat benefit from your chosen radiator. We strongly suggest this is done before purchasing your radiator.

What radiator designs offer the best heat output?
Basically, the bigger surface area that a radiator has, the more heat output will be generated. Another general guide is that painted finishes offer a slightly better heat output than chrome-finished items. To optimize the space you have available, we offer radiator designs that can be fitted horizontally or vertically. To get additional heat output from the same area, you can also choose options that include multiple rows of tubes, panels and columns.

Radiator colour options
From stock, we offer the most current fashionable colour options across a wide range of products. Please note that owing to the printing process, the actual colours on the radiators may vary slightly from those shown in our brochure.

Pipe centres
All our dimensional details are published in our current brochure and on our website. However, owing to manufacturing tolerances, we strongly suggest that your final pipework position is not completed until you actually receive delivery of your radiator.

Electric-only radiators
Where your installation location does not have immediate access to an existing water supply, we can offer purpose-made electric-only products for a quick and easy solution to your heating needs. These electric-only products are supplied pre-filled with an electrical inhibitor solution, and fitted with a compatible heating element.

Dual-fuel radiators
Some of our radiators can also work as dual-fuel applications, which means that when your main heating system might be turned off in the summer months, you can still operate your radiators electrically if required. Please consult your plumber before purchasing heating elements.

Radiator valves options
Depending on your choice of radiator, we have several styles to choose from, details of which can be found on the left hand page.

Warning / Precautions
Qualified persons should make all electrical and plumbing connections. When fitting radiators with heating elements, the radiator must always be mounted with the element at the bottom with the radiator in the upright position. Failure to do so may result in a fire hazard.

Traditional. For those with an eye for timeless elegance.

This is vintage design, created with a modern twist.
